

COMPRESSORS & COMPRESSED AIR

Hazard		Satisfactory	Needs Attention	Not Applicable	Target Date for Completion	Date Completed
1	Are compressors equipped with automatic, temperature activated shut off mechanisms, or with fusible plugs installed in the compressor discharge lines as near the compressor as possible?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
2	Are compressors equipped with automatic pressure release valves, pressure gauges, and drain valves?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
3	Are compressor air intakes installed and equipped so as to ensure that only clean uncontaminated air enters the compressor?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
4	Are air filters installed on the compressor intake?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
5	Are compressors operated and lubricated in accordance with the manufacturer's recommendations?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
6	Are safety devices on compressed air systems checked frequently?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
7	Before any repair work is done on the pressure system of a compressor, is the pressure bled off and the system locked-out?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
8	Are signs posted to warn of the automatic starting feature of the compressors?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
9	Is the belt drive system totally enclosed to provide protection for the front, back, top, and sides?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
10	Is it strictly prohibited to direct compressed air towards a person?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
11	Are employees prohibited from using highly compressed air for cleaning purposes?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
12	When using compressed air for cleaning, do employees wear personal protective equipment?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
13	Before compressed air is used to empty containers of liquid, is the safe working pressure of the container checked?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
14	Are safety chains or other locking devices used at couplings of all high pressure hose lines of 3/4" dia. or larger, and lines of smaller size, where a connection failure would create a hazard?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
15	When compressed air is used with abrasive blast cleaning equipment, is the operating valve a type that must be held open manually?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
16	When compressed air is used to inflate auto tires, is a clip-on chuck and an inline regulator preset to 40 psi required?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
17	Is it prohibited to use compressed air to clean up or move combustible dust if such action could cause the dust to be suspended in the air and cause a fire or explosion hazard?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
18	If compressed air is used for cleaning off clothing, is the pressure reduced to less than 10 psi?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
19		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
20		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
21		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
