AGENDA ITEM 4: MARKET OUTLOOK AND ECONOMIC UPDATE

Josh Feinman, Chief Global Economist of Deutsche Asset Management provided a broad macro economic update of the U.S. and global markets. The expansionary phase continues through the 4Q 2017 and will become the second longest on record by Spring 2018. The probability of the expansion ending is independent of its duration and normal catalysts that impede the expansion are largely absent. The labor market continues to heal and the U.S. is close to full employment. Inflation has not met or exceeded expectations this year and is edging gradually back toward the target. Looking ahead, it is expected growth to remain slightly above diminished potential, allowing labor market to complete their recovery. The positive underpinnings are sound household and business finances, accommodative financial conditions, modest stimulus from Washington DC, and improved global backdrop. Globally, markets are synchronized with Europe, Japan, and China in recovery along with the U.S.

The labor markets are tightening with job growth at a more moderate pace. With full employment near, job growth will eventually have to cool to prevent overheating. The cooling need not be abrupt or drastic as the labor cost is showing only modest signs of increasing. Further acceleration in labor cost is likely at a gradual and modest rate. Productivity growth has been sluggish and inflation expectations remain subdued. Gradual rate hikes by the Federal Reserve will continue with the next hike likely in December 2017 followed by two more in 2018 and with these rate hikes core inflation is expected to move up at a slow rate. With the upcoming Federal Reserve appointments leadership will remain reasonably mainstream with no major shifts in the near-term Fed policy.

Structural challenges reflect slower potential growth globally and weaker demographics with slower growth in the working age population. Labor productivity is sluggish with a widening income inequality due to social/political factors and repercussions from rollbacks within the global system due to trade agreements.

Sen. Machado requested public comment on the appropriateness of Closed Session Agenda Items 7, 9 through 11, of which there was none.
