

Silica Exposure Prevention

Silica is a silent killer. Each year, more than a million construction workers are exposed to crystalline silica, the main cause of silicosis. This disabling and potentially fatal disease is incurable, but 100% preventable. State Fund is partnering with Cal/OSHA Consultation to offer FREE half-day seminars statewide. These seminars will cover the new Cal/OSHA Respirable Crystalline Silica standard for construction, as well as existing silica standards and are open to our policyholders and the public.

Speakers are from Cal/OSHA Consultation and/or State Fund.

**Wednesday, April 4, 2018
8AM-12PM (English Only)**

State Compensation Insurance Fund
1750 E. Fourth Street
Santa Ana, CA 92705
San Clemente Room

To Register:
Online: www.statefundca.com/seminars
By Email: safetyseminar@scif.com - please specify date/location/time and attendees names

For questions or to reach us by phone, please call
Leyna Tran at 707-624-4591

Please register by 04/01/2018

Can't make this date? A complete list of upcoming seminars can be found at

www.statefundca.com/seminars

For more safety content, go to www.statefundcablog.com.

Participants will learn:

- How to reduce and eliminate silica hazards.
- How to educate workers about the types & symptoms of silica exposure.
- How to develop and implement an effective silica control program.
- How to comply with the new Cal/OSHA Respirable Crystalline Silica standard for construction.
